

PTZ Camera Controller

K10

IP PTZ Keyboard Controller for Up to 6 Cameras

**Pan, tilt and zoom
with one joystick.**

6

PTZ cameras
per controller

4D

Joystick with
twist-to-zoom

10

Preset positions

ONVIF

Protocol 2.4
with auto-discovery

K10 is a compact IP keyboard controller for CAVE PTZ cameras. A 4D joystick controls pan, tilt and zoom, and a single RJ-45 network cable connects up to 6 cameras discovered automatically over ONVIF.

1

4D Joystick

Control pan, tilt and zoom of the PTZ camera instantly. Twist the joystick to zoom in and out, and press to confirm.

4

Up to 6 PTZ Cameras

Connect and control up to 6 PTZ cameras at the same time from one controller.

2

Easy Network Connection

Control any CAVE PTZ camera on your network over a single RJ-45 cable.

5

10 Preset Positions

Set up 10 preset positions and recall them to move cameras to any area you want.

3

ONVIF and Auto-Discovery

Connects to cameras easily over ONVIF and supports auto-discovery.

6

Web-Based Setup

A built-in web setup page (IE, Chrome, Safari and others) and an on-screen display give you full control of the settings.

Specifications

Item Specification		
■ PTZ Camera Control	PTZ Protocol	ONVIF 2.4
	Joystick	4D joystick (3-axis + 1 button): direction control, twist to zoom in/out, confirm button
